

Rubric 1: Scenario-Based Lab Skills

You are an HCA working in a residential care home. Today you are assigned to provide morning care for Edith Blaise, a 92-year-old woman who has recently fractured her left foot. This morning when you enter Ms. Blaise’s room, she asks you to assist her with a bedpan. Following this, you will assist Ms. Blaise with a partial bed bath, assist her with dressing, and transfer her to her wheelchair using a full mechanical lift.

Depending on the case scenario, each required skill could be evaluated as follows:

Skill performed	Unsatisfactory (Indicate where applicable with a ✓)	Satisfactory (Indicate where applicable with a ✓)	P=PASS F=FAIL R=Redo
Assists with a bedpan	<ul style="list-style-type: none"> <input type="checkbox"/> Ineffective organization and prioritization (did not gather required supplies and managed time improperly) <input type="checkbox"/> Did not perform skill following correct lab procedures <input type="checkbox"/> Performance of skill was unsafe <input type="checkbox"/> Improper medical asepsis <input type="checkbox"/> Incorrect body mechanics <input type="checkbox"/> Inadequate communication with client <input type="checkbox"/> Does not attend to client comfort and/or support dignity 	<ul style="list-style-type: none"> <input type="checkbox"/> Effective organization and prioritization (gathered required supplies and managed time properly) <input type="checkbox"/> Performed skill following correct lab procedures <input type="checkbox"/> Safe performance of skill <input type="checkbox"/> Proper medical asepsis <input type="checkbox"/> Correct body mechanics <input type="checkbox"/> Adequate communication with client <input type="checkbox"/> Attends to client comfort and supports dignity
