Steps for Customizing the
Safer Campuses for Everyone Training

(1) Purchase a subscription to Articulate 360 (Articulate 360 includes a subscription to two applications, Articulate Storyline and Articulate Rise).

(2) Request copies of the *Safer Campuses for Everyone* training by completing the form on the BCcampus website. Remember, there are two versions of the course - one for students and one for faculty, staff, and administrators. (Note: Please use the email address that is associated with your Articulate Rise account as copies are shared directly through Articulate.)

(3) Edit the course content in Articulate Rise.

(4) Once the edits are completed in Rise, export the customized course as a SCORM package. (The SCORM format is recognized by almost all learning management systems).

(5) Upload the customized SCORM package into the learning management system (e.g., Moodle, Blackboard).
